

Ph. D. Course in Bionanotools and Protein Structure

Department of Molecular Biology,
Interdisciplinary Nanoscience Center (iNANO),
Faculty of Health Sciences,
University of Aarhus, Aarhus, Denmark

August 9-13, 2004

Topics:

Nuclear Magnetic Resonance

Electron- and Confocal Microscopy

Mass Spectrometry

Structure Prediction

Circular Dichroism

Calorimetry

Atomic Force Microscopy

X-Ray Crystallography

Small-angle X-ray Scattering

Surface Plasmon Resonance

Scanning Tunneling Microscopy

Molecular Dynamics Simulation
